Notary Public, Honolulu, County of Oahu.

TUESDAY, FEB. 27, 1906.

Now H. H. Rogers will lose his memory in all matters relating to Standard Oil operations in Missouri.

When Col. Spaulding calls the Molokai Hungarians, it is a reminder of the time in which Americans once referred to the Hessians.

Congress without making much fuss about it has provided additional funds to complete the mail quarantine station of Honolulu harbor. That of itself is worth thousands to Hawaii.

Dr. Atcherley says he has sometimes written in the "irritation of the moment." Judged by the size of the Kona mail to the Bulletin we have sometimes thought it was irritation.

John D. Rockefeller has been discovered. As a result of this incident we learn that one of the pleasures of being a one-hundred-thousandaire is playing at hare and hounds with courts and newspaper reporters.

Chinese have so far killed only French and English missionaries, and get back at Americans by refusing to buy their goods. This gives a slight insight to the Chinese idea of how to most deeply injure its declared enemy.

Statements of the Atcherley family don't dovetail. One says that the majority of the district is all stirred up and later another blandly assures the readers of the Bulletin that only two or three care anything about it anyway.

SUPPORT THE YACHT RACE

Honolulu set such a high mark in handling the floral and pau parade that the leaders as well as the rank and file of the town should approach the next great event with confidence, liberality and enthusiasm.

The ocean yacht race to be held in the spring has already done a great deal toward bringing Hawaii before the public in a most favorable manner. It is opening out a new line of thought for all mainlanders. Though the empire has been steadily marching on a westward course, the thought that the Pacific is ripe for a great yacht race comes to average humanity as a pleasant awakening.

There is no doubt that the islands will be wonderfully benefited by this enterprising move of the Promotion committee, especially if the town will give the support warranted.

Hawaii must have a yacht in the race. It must see that the visitors are properly entertained. The program must have other features than the mere sailing to Honolulu. To do this requires money. Every business man should be convinced by this time that money invested in promotion is certain to reap ample dividends.

ONE ACRE IMMIGRATION

Readiness of diverse and sundry plantation managers to guarantee European immigrants an acre of land can hardly, with full justice to all concerned, be hailed as new.

According to all the statements issues and promises made, this is exactly what the various plantations have been basing their action on for three months or more. This is what the Immigration Board has been considering with favor. To the public it has been one of the exhibits of good faith.

The Territorial government should certainly hesitate to parcel out its lands until satisfied that the property will go to bona fide settlers. It is not remarkable then that sugar plantations men should hesitate to build more than one house and give more than one

GOVERNOR AND SCHOOLS

It may have been a stroke of genius or a small political inspiration that suggested the idea of petitioning the Governor or the Acting Governor of the Territory to borrow the money to provide the public schools with the janitors they need.

We are willing to let it rest as genius. The scheme is a splendid one, except that it won't work, either coming or going.

The Governor of the Territory has no authority to borrow money for the public schools unless he does it on his private credit and makes a donation. Any citizen can do that. The people might petition until doomsday and the Governor might promise to be as good as a fellow as the elasticity of his personal credit will allow. Meanwhile the schools would still be free from disturbance by janitors. Pupils and teachers would be sweeping out the schoolrooms.

As the Bulletin has previously stated, the problem in its immediate demands is one for the Honolulu pupils, Honolulu teachers, and Honolulu taxpayers. Nothing has yet been presented to show that money could not be made available from the County funds to correct the miserable conditions brought about by the shortsighted legislative policy.

Petition to the Governor only fight the cause with wind mills. Of course the Governor will do what he can. Governor Carter asked for ample money in his estimates, but the Legislature in its wisdom did not appreciate his good sense. That was as far as any Governor could or can go. He cannot draw warrants on Territorial credit as seems fit, though he may refuse to float all the bonds authorized.

Oahu Supervisors can settle the school question if they will. Or at least they over till a Legislature is in session to provide necessities.

TOURISTS' HEADQUARTERS.

The latest fiction, the largest assortment of Hawaiian postals, island curios, etc., Wall, Nichols Co., Ltd.

PASSENGERS ARRIVED.

From Kau, per stmr. Mauna Loa, Feb. 27: A. S. Blake, E. E. Mellen, E. A. Palmer, S. Stephenson, Miss A. P. Mitchell, Dr. J. S. B. Pratt, F. O'Brien, Miss P. Oki, Mrs. H. Oki, Miss M. De Cauno, J. Sloan. From Kona ports: W. W. Brunner, E. M. Grosse, Dr. N. A. Cobb, Miss F. Mascos, Elizabeth Laloha, W. M. Campbell, W. C. Moore, J. D. Paris, E. Hardee, R. S. Kelly, Father Windless. From Maui ports: A. P. McDonald, Rev. Kong Yan Te, M. M. Keohokalelo, W. Conway, A. Whitaker, Dr. A. J. Derby, L. G. Kellogg, S. Anno, Mrs. Kalliko.

At the meeting of the McCully Improvement Club held at the residence of Chas. R. Frazier last evening, J. B. Gilson was elected to fill out the executive committee. R. C. Brown is president, Chas. Bon is secretary, C. C. Rhodes is treasurer and Guy Owens is delegate to the central committee. B. P. Thurman and C. L. Hopkins compose the committee on membership. Each member is a committee of one to look up needed improvements and report at the next meeting.

Superintendent of Public Instruction has called a meeting of the probation officers appointed by Judge Whitney, Jr., to take place tomorrow afternoon, at which the subject of truancy men be discussed.

Sealed tenders are called for by the County Clerk for constructing a concrete bridge at Kaipapau, Koolauloa, Oahu.

There is a movement on foot to have the various improvement clubs start a crusade on insects injurious to plant life.

GENERAL LEWDNESS

(Continued from Page 1.)

or refer the case to the Territorial authorities, or give the defendant a light sentence, such as he would be liable to under the law of the Territory. The latter way was properly the better of the two.

District Attorney Breckons stated that while he agreed with Kingsbury as to the result he did not agree with him as to the reason for it. His argument might be taken as a criticism of the action of the Federal authorities in taking action in the case.

The United States had the authority to see that the marriage vows were not violated, and in every case where it could legislate in the matter it did all it could to protect the marriage. It was true that it was not its purpose to look after the general practice of lewdness, but merely to protect marriage. In this case a woman had chosen to cast aside the United States laws regarding marriage, and Breckons believed that it was the intention of Congress that such a woman should be punished. He had at first been informed that Revara knew of her former marriage when he married her. Later on Breckons had ascertained that he had been ignorant of the fact at the time, and he was willing to give him the benefit of the doubt. He agreed with Kingsbury as to the result, at the same time protesting that the prosecution of cases of this kind was not contrary to the spirit of the law.

Kingsbury still contended that the law owed its origin to a political question, and that it was not the duty of the United States to do the cleaning up of the alleyways of this Territory. He had, however, not meant to criticize.

Judge Dole, after summing up the facts of the case, expressed himself as differing to some extent from the views expressed by Kingsbury, although, he said, it was not the policy of the officers of this court to prosecute all cases of adultery. Kingsbury had made a strong argument for the defendant, who was also entitled to some consideration as it appeared that he had not known of the woman's former marriage when he married her. His offense lay in living with her after he had found out about it. He would be punished lightly. Revara was then sentenced to one month's imprisonment.

H. P. Baldwin passed a good night and is resting easily today. There is every indication that he will recover speedily from the operation for abscess in the ear performed yesterday.

BY AUTHORITY

NOTICE OF APPOINTMENT.

Notice is hereby given that I have, this day, appointed James D. McInerney to be a member of the Honolulu Park Commission in place of Francis M. Hatch, Esq., resigned.
A. L. C. ATKINSON,
Acting Governor of Hawaii,

YIELD 28,000 TONS.

(Continued from Page 1.)

anticipate as large a crop in 1906 as there was in 1905. The ravages of leaf-hopper were very generally distributed over the plantation; and the exceedingly cool months of January, February and March, 1905, are easily remembered. I place the output for 1906 at 28,000 tons sugar.

Crop 1907.—This is looking very well and is of good size. It has had an earlier start and an earlier fertilization than any crop for several years, and, other things being equal, should show good returns.

The mill work was excellent throughout, and the loss on sugar in transit to market slight.

The original boiler plant of the mill has been entirely renewed. The mill, with the extensive alterations and repairs of the last five years, is now practically new. Improvements have been effected in the unloading machines at the cane carrier, which have not only lessened materially the number of men handling these devices, but have made the work much easier for the reduced force.

Knives for cutting cane before delivery to No. 1 mill were added during the season. There are no improvements in mill involving large expenditure, contemplated for 1906.

Permanent Improvements.—To the rolling stock there have been added a new locomotive weighing 22 tons and 23 new cane cars.

There have been purchased also during the year, 3 miles of 30-lb. rails and ties for same to replace the 18-lb. rails on branch tracks which, either were worn out by long service, or were needed for extra portable track necessitated by the use of four loading machines.

Cane Loading Devices.—Three Wilson-Webster cane loading machines were purchased during the year. While these are, to my thinking, a profitable investment for the reason that they do not require picked men for the laborious work of loading, and they need less men to handle a given quantity of cane. At the beginning of the season their cost of operation was excessive; but, after the workmen were "broken in" to their use, this expenditure was reduced to a very satisfactory degree.

The main drawback to the Wilson-Webster loader is the quantity of leaves gathered on the bundles of cane by dragging over the field to the machines.

Ten New Houses.—There have been 10 houses of all sorts added to Buildings' account, not counting various additions and enlargements to other structures. In all the additions and enlargements to buildings have cost \$12,000.00 in round numbers.

The largest expenditure on improvements and replacements has been in the mill, of which some description has been given before. And of this the largest item has been the 6 new boilers of say 200 horsepower each, \$1,016.91, returned, arrive in Honolulu at 10:10

livery to No. 1 mill were added during the season. There are no improvements in mill involving large expenditure, contemplated for 1906.

GAS STOVES
New Process Gas Ranges

These have been bought at prices much below the market on account of our taking a whole consignment.

The goods are well known and we are able to sell them upon especially favorable terms.

Blue Flame Oil Stoves

An assortment just to hand by the "Gerard C. Tobey."

Pacific Hardware Co., Ltd.

BEFORE BUYING GET OUR PRICES.

The grand total of permanent improvements for the year was \$89,379.18. Insect Pests.—As a whole the leaf-hopper seems to have done fully as much damage on crop for 1906 as it has ever done before. On the Crop of 1907 they are not as much in evidence as they were at an even date last year.

Judging from the time it has been established here, viz.: over two years, the Fairchild parasite does not seem to be numerous on the Ewa Plantation. Nor does the spider from Hawaii, which did good work there, thrive here. It is to be hoped that the egg-parasite from Australia will prove more active. Several species of these are established at Ewa. The Entomologist themselves do no look for any marked evidences of reduction of leaf-hopper from attacks of the egg-parasite until the end of this year.

Experiment Station.—During the past year an experiment station has been established for the purpose of determining the most profitable fertilization methods and for testing values of different varieties of cane. One of the largest single items of expense on this plantation is fertilizer. It averaged during the past four years in the neighborhood of \$20,000.00 per annum. While the present area of the station is but 4 acres, the major portion of which is devoted to fertilizer tests, it will be very much enlarged during the coming year to accommodate plots for experiments with varieties of cane.

Proposed Expenditures.—The only large expenditure required in 1906 will be in the erection of houses for laborers expected from Europe. One Kennedy cane loader has been purchased in January of this year for comparative tests with the Wilson-Webster machines. The former has not been in use long enough to demonstrate fully its efficiency.

There has been a good price for the 1905 crop of sugar, and in sales of product attention may be drawn to the increased sales of molasses.

For the second time in its history the Ewa Plantation has wiped out a bond issue necessitated by the enlargement of the Plantation, and, in the last instance, by the erection of a new mill building modern in every respect. The Plantation is free from debt, there is a fair credit balance to start with on season of 1906, dividends have been paid, and, take it on the whole, there has been a more prosperous crop for the Plantation than that for 1905.

Disposition of Earnings.—Net gain for the year, \$967,966.61; dividends to shareholders during 1905, \$900,000.00; applied in reduction of plantation's account, \$70,000.00; loss on 1975 shares California & Hawaiian Sugar Refining Co.'s stock, sold to Sugar Factors Co., \$105,570.00; reduction of surplus this year, \$197,966.61; total assets, \$6,371,112.97; net assets, \$6,216,899.00.

OWE PEACOCK LITTLE

W. C. Peacock & Co., Ltd., has filed an answer as garnishee in the case of Henry May & Co., Ltd., vs. W. C. Peacock, through its treasurer J. J. Rothwell. It is shown that on Aug. 2, 1905, when it was served as garnishee, the company was indebted to Peacock in the sum of \$20.74 and had no goods or effects belonging to him. By a deed of assignment, dated July 24, 1905, the defendant assigned to Bishop & Co. the rents due under a certain lease, at \$200 a month, made by him to the garnishee. On Aug. 5, 1905, the garnishee paid the assigned \$200 as rent for August. The garnishee gives notice that it intends to rely on the deed of assignment as justification for the payment of \$200, but it stands ready to pay the sum of \$20.74 if so ordered by the court.

BY AUTHORITY

SEALED TENDERS

Will be received at the office of the County Clerk, County of Oahu, until 12 noon of March 6th, 1906, for the erection and completion of a reinforced concrete bridge, at Kaipapau, Hanalei Homestead, Koolauloa.

Plans and specifications are on file at the office of the County Clerk.

The Committee on Roads, Bridges and Parks reserve the right to reject any and all tenders received.

Certified check for 10 per cent of the amount of the bid, payable to the County Clerk of the County of Oahu, must accompany all bids.

J. LUCAS,
E. R. ADAMS,
Committee on Roads, Bridges and Parks.

3318—Feb. 27, 28, Mar. 1, 2, 3, 5.

PARTICULARLY FORTUNATE

(Continued from Page 1.)

crop we are cultivating 2,000 acres of plant cane and 1,700 acres of ratoons. We were unable to plant all we had planned as our new set of steam plows did not arrive on time. We were unable to get them into the fields until July 1st, after which date, however, they did excellent work, not having been laid up for repairs a day. The early plant and ratoons are in excellent condition but late planted fields have been somewhat retarded by the cold weather. There is practically no leaf-hopper to be found now, due, I think, largely to predatory insects introduced by the H. S. P. A. Experiment Station. We are also indebted to the Experiment Station for eleven varieties of cane new to the islands, some of which promise well.

We began plowing for the 1906 crop December 7th and plan to plant 2,000 acres and ratoon 1,800. Whether we can do so or not will depend however on our water and labor supply.

Big Improvements.—The Maui Agricultural Co. has invested in Permanent Improvement, \$1,692,376.00, which amount includes \$216,733.00 expended by Haku Sugar Co. and Pala Plantation on the new ditch previous to the formation of the Copartnership. The improvements consist principally of the new ditch, the new factory and the extension of our railroad system. Besides the above we have purchased a new locomotive and more rolling stock, built a new camp on the plains, enlarged the old camps, built several cottages for head men and purchased a new set of steam plows. The value of the property has unquestionably been enhanced to the extent of the amount invested under this head.

During the coming year it will not be necessary to do much in the way of improvements other than railroad and ditch extension and the completion of the new factory. However, if our returns will warrant, we should do considerable in the way of reservoir construction and should build a new and up-to-date hospital.

The Maui Agricultural Co.'s operating expenses for 1905 amounted to \$794,831.80. Under "growing crops," the following appear: Sugar, \$6,808.62 and pineapples, \$7,927.97. Haku ranch crops. The Maui Co.'s total sugar crop for 1905 was 17,753.25 tons. The company has a surplus of \$857,969.72. HAKU SUGAR CO.
